

SUMMARY

CNC Machinist with 8 years of experience machining precision components for the medical and automotive industries. Experienced in machine setup, operation, tooling selection, blueprint interpretation, quality inspection, and maintaining tight tolerances. Proficient in G-code programming and conversational programming on EMCO CNC machines, with prior certification and hands-on experience operating HAAS equipment. Recognized for strong troubleshooting skills, attention to detail, and a commitment to producing high-quality parts in fast-paced manufacturing environments. Experience in CMM programming for testing the quality of machines parts.

WORK EXPERIENCE

PACE Industries - CNC Machinist & CMM Programmer (2015-2017)

- Machined final features on parts that were primarily created in die cast machines
- Changed part fixtures in machines when swapping to different part types
- Gauged parts with quality certified gauging
- Wrote CMM programs to perform capability studies on products before mass production began
- Edited G-Code when necessary to complete machine setup

Smith & Nephew - Senior CNC Machinist (2017-2021)

- Machined medical grade knee replacement components on CNC mills and grinders
- Tested parts with specialized quality certified go and no-go gauges
- Used optical comparators to check articulating surface dimensions

D-Pad LLC - Software Engineer & Company Owner (2021-2026)

- Developed full-stack web applications for clients that contracted out my services
- Wrote low level computer code for high performance data analytics and real time data streaming

SKILLS

Programming Languages: G-Code, C++, Rust, Python, Java, Typescript, SQL, HTML5, CSS

CAD Modeling: Autodesk Inventor, FreeCAD

CMM Programming: Zeiss Calypso, PC-DMIS

3D Printing: Cura

EDUCATION

Midsouth Community College, CNC Machining / 2010-2012

Completed 2 years of CNC machining and programming courses

Southern New Hampshire University, Computer Science / 2018-Present

Concentration in Software Engineering
