

Chase Fincher

SOFTWARE ENGINEER / FULL STACK DEVELOPER

www.dpadllc.com

Marion, AR

(901) 422 3400

SUMMARY

Software engineer with 5 years of experience building full stack applications and solving complex technical problems. Experienced across the full development lifecycle, with a growing focus on low-level programming, embedded systems, and performance-oriented development. Business owner and contractor specializing in high frequency stock and futures trading application design.

WORK EXPERIENCE

Gezellig Capital LLC - Software Engineer (Full Stack Developer)

2021-2026 via D-Pad LLC

- Built high-performance RESTful web APIs for real-time data streaming and statistical analysis, enabling low-latency application behavior for trading tools and data-driven workflows
- Designed and developed browser-based user interfaces with a focus on usability, real-time data visualization, and live WebSocket synchronization, improving user experience and application responsiveness
- Designed user experiences for web-based trading applications by defining workflows, information architecture, interface layouts, and real-time data visualizations
- Designed and optimized relational database schemas for large historical trading datasets, improving query efficiency and supporting faster analytical workflows
- Managed Linux-based production and development systems, improving reliability and supporting efficient troubleshooting and maintenance
- Configured reverse proxies, container networking, and inter-service communication for distributed applications, strengthening system stability and service connectivity
- Administered self-hosted infrastructure including DNS, firewall, and routing configuration, improving internal network control and operational resilience
- Automated deployment and system administration tasks with shell scripting and Linux tooling, reducing manual work and improving consistency across environments

SKILLS

Programming Languages: C++, Rust, Python, Java, Javascript (ES6+), Typescript (ES6+), SQL, HTML5, CSS

Frameworks: VueJS (v3.5), Flask, FastAPI, Tokio

Platforms & Tools: PostgreSQL, MariaDB, MySQL, Android SDK, Linux, Docker, Git, NGINX

Cloud & Infrastructure: REST APIs, WebSockets, Docker compose, container networking

UX Design: Figma, InkScape, GIMP, Photoshop, Illustrator

Platform Specific Languages: Pine Script (Trading View), Easy Language (Trade Station)

AI: ChatGPT, Grok, Claude

EDUCATION

Southern New Hampshire University, Computer Science / 2018-Present

Concentration in Software Engineering

- Took 3 years off while working as an engineer at a startup company
